

Prepare for power outages with **BATTERY STORAGE**

If you rely on electric or battery-powered medical equipment you may qualify for PG&E's Self-Generation Incentive Program (SGIP).

During wildfire season, PG&E may be required to turn off power in communities experiencing severe weather conditions that could spark a fire. This statewide policy is called Public Safety Power Shutoff or PSPS. Because of the potential need for a PSPS, it is particularly important for customers who rely on medical devices to consider the SGIP program, which can provide incentives to cover 100% of the purchase cost for qualified customers.

WHAT IS BATTERY STORAGE?

- Battery storage offers extended power in your home by storing electricity charged from the grid or your rooftop solar system.
- It can be programmed to turn on automatically when there's a power outage.
- It can extend your home's power from several hours to multiple days.*

*How long your system will provide backup power depends on your battery size, critical energy needs and (if paired with rooftop solar) weather conditions. Talk to a battery installer to learn more about your specific needs and options.

WHAT IS SGIP?

SGIP is a PG&E program for qualifying residents offering incentives to cover 100% of the purchase costs of battery storage.

HOW DO I QUALIFY FOR SGIP?

- You can qualify for free battery storage if:
 - You are a Medical Baseline Customer, **OR**
 - You've notified PG&E of a medical condition that could be life-threatening if power is lost, **OR**
 - You're income qualified **AND** you live in a high fire-threat area, **OR**
 - You've lost power in a Public Safety Power Shutoff two or more times.
- Renters are eligible for this program but will require approval from their landlord before installation.
- Equipment is designed to last at least 10 years. Equipment maintenance must be included in the purchase or lease contract.

HOW DO I GET STARTED?

- Your contractor or community partner will help walk you through the application. They'll confirm your eligibility and approval to have 100% of the costs covered, before the installation begins.
